Milestone 7: Final Submission
Team Entertainment 720 (111-2)

⏰ UPRIGHT

Project: UpRight
- **Description:** UpRight is a website with an alarm clock that requires the user to complete a Hangman-style game to turn off the alarm, then takes the user to a screen of useful, up-to-date information. It helps the user to wake UpRight.
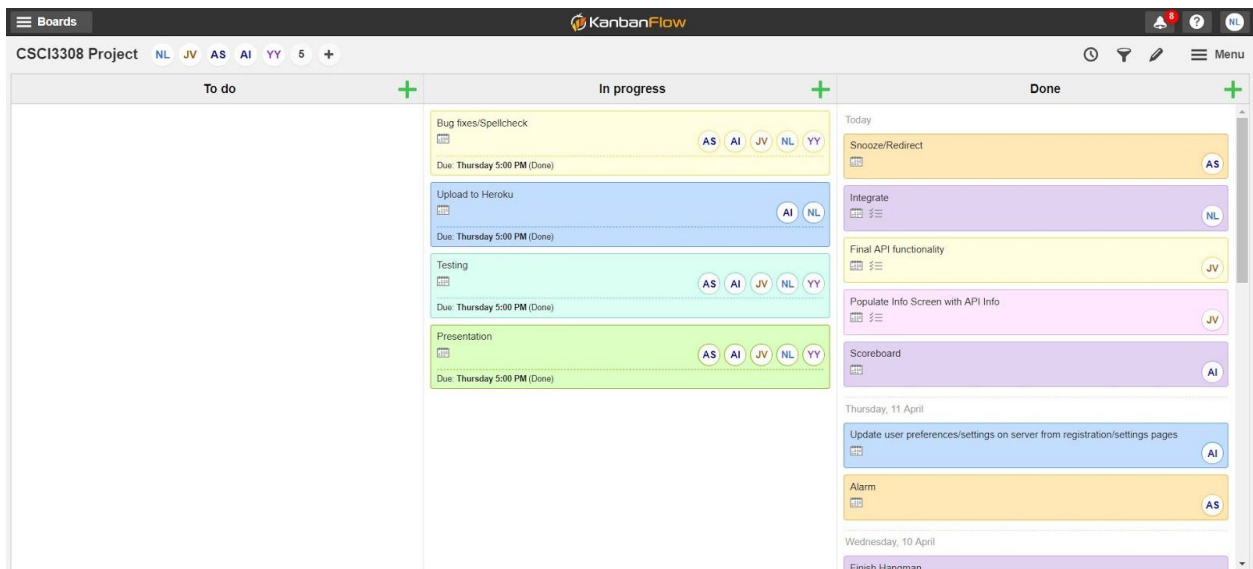

Team Members:
- **Aidan Baack**
  - Developing the express server and creating users route
  - Creating the necessary database tables
  - Adding user authentication and storing hashed password
- **Jaykob Velasquez**
  - Adding APIs to information page
  - Creating HTML forms for registration and login
  - Styling each page of the website
- **Nicholas Lescanic**
  - Adding APIs to information page
  - Finding hangman puzzles and other necessary information
  - Creating hangman game with alarm
- **Yicheng Yi**
  - Creating HTML forms for the settings page

- ○ Adding scoreboard page and creating server route for user scores
- **Adam Spiers**
  - ○ Creating the alarm clock
  - ○ Implementing time tracking to ensure alarm gets properly set
